

Ghana Solar Installers — Beta-Testing Invitees

Compiled: 2026-06-05 **Purpose:** SolarPro Global beta-testing invitation list. **Source:** Public web (company websites, ENF Solar directory, Ghana Yellow Pages). **Count:** 12 entities.

All emails, phone numbers and addresses below were collected from public web sources on 2026-06-05. Verify before sending production-scale outreach — Ghana mobile numbers change networks; e-commerce sites may not publish street addresses.

How to use this list

1. Sort by **roles** in `data/ghana_beta_invitees.json` (companies that are both suppliers and installers get the strongest invite — they have BOQ + design needs).
 2. Invite Tesano/Tema-based companies first (Nocheski, Ozo, Translight) — they are easiest to visit in person if a phone call lands in voicemail.
 3. **Phones** are listed with the most recent first — call before emailing; Ghanaian SMB owners answer phones more reliably than e-mail.
 4. **Contact person** is blank where no individual name was published — start with `info@ / sales@` aliases, then ask for a named lead on the first call.
